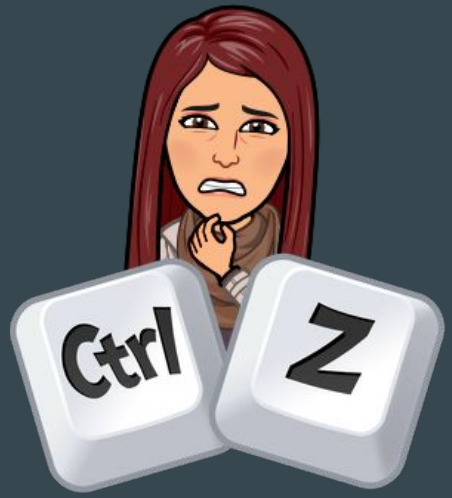
Technology - Digital/Web Tools

1. Technology



- Technology is inevitable in our everyday lives;
- Life without technology is pointless in today's dynamic world;
- New technologies improve work and help to save lives;
- Technology brings together tools to promote development, use and information exchange;
- Technology makes tasks easier and it helps solving many problems of mankind;
- Technology is important in our day life in many ways that we cannot ignore purposefully.

2. Technology - digital tools in the classroom

- Digital tools make possible to teach through games and gamification;
- Digital tools increase students' engagement while presenting educational content that is visually compelling and fun;
- Digital tools enhance our learners' motivation and develop their critical thinking, communication and problem solving skills crucial in the 21st century;
- Digital tools create a more dynamic and creative environment in the classroom.
